

Think Outside the Cart

LocusBot is the industry's most technologically advanced autonomous mobile robot, incorporating the latest visualization and navigational elements. Its lightweight design makes it highly efficient and flexible, easily working collaboratively alongside your workers.

Locus's multi-bot approach allows the warehouse operator to think outside the traditional cart to improve overall efficiency and productivity by two to three times.

Flexible + Scalable

Works within your current physical space and bots can be added/reduced based on demand at any time

Integrated multi-language display

The crisp, colorful, clean display is easy to use, designed to be as intuitive as any other everyday app

Highest picking productivity

Bots do the walking, people do the picking – keeping workflows efficient and pick rates high

Maximize Productivity

Features + Accessories

From auto-charging to gamification, to congestion management and accessories, this solution is built to fit your specific needs

LocusBot

Intelligent, autonomous mobile bot

Unlimited Container Configurations

End-to-End Solution

Flexible Design

for many container types

Easy Integration

with existing WMS

Zero Disruption

adapts to current infrastructure

Quick Deployment

add or reduce bots on demand

Intuitive User Interface

multi-language & visual instruction

Specifications

Dimensions	22" diameter x 57.8" H
Weight	100 lbs
Container Types	Wide range of formats
Operating Time	14 hours per charge
Charge Time	50 minutes to full charge
