

Powering the robotics ecosystem, AnyFleet is idealworks' intelligent automation platform. Cloud-based and vendor-agnostic, it connects and controls mobile robots, IoT devices, and systems. With real-time data, VDA 5050 compatibility, and full logistics visibility, AnyFleet transforms fleets into intelligent systems, turning complexity into clarity and capability into performance.

Built for now, ready for what's next

Vendor-Agnostic Integration	Orchestrate a wide range of automation hardware from different manufacturers.
API & Ecosystem Connectivity	Integrates seamlessly with ERP, WMS, MES, and WCS for smooth IT connectivity.
Scalability	Deploy flexibly — from pilot projects to enterprise-wide operations.
Cloud-Native	Benefit from secure, flexible deployment options (cloud or on-premise).
Standard Compliance	Ensure compatibility through support for VDA 5050 and other open interfaces.
Real-Time Monitoring	Access live dashboards, fleet KPIs, and insights from IoT devices.
Task & Traffic Management	Optimize operations with intelligent job assignment, routing, and traffic flow control.
Peripherals Integration	Connect to peripheral devices such as vehicle tracking systems, gates, doors, or conveyors.
User Interface	Fast deployment and intuitive operations with a simple, user-friendly interface.

Application Areas

AnyFleet connects and controls manual vehicles, AGVs, AMRs, IoT devices, and management systems. From logistics and warehousing to manufacturing and production to automotive — AnyFleet is powering the future of Industry 4.0.

Key Benefits

Scalable automation goes beyond mobile robots. From first deployments to multi-site operations, AnyFleet gives you the flexibility, intelligence, and power to grow.

Strategic Value

AnyFleet isn't just software — it's your foundation for long-term automation success. Open, scalable, and vendor-agnostic, it protects your investment, keeps you flexible for tomorrow's technologies, and ensures your operations run smarter every day.
