

# FACT SHEET 2018

## COMPANY

ProGlove develops smart gloves that enables manufacturing and logistics staff to work faster, safer and more ergonomically. Process steps can be documented hands-free, giving instant feedback to the user.

With ProGlove, ergonomics, efficiency and quality are at the core of its functionality since you work and scan at the same time. After launching our products successfully in the European market, we plan to enter the US and Canada in 2018.

We are a Munich-based company founded in December 2014 by former BMW and IDEO employees, after winning the Intel "Make It Wearable" Challenge.

Our **1st Smart Glove for Industries** has already convinced companies like BMW, IKEA and other board executives.

*"Human centered design meets German engineering,"*

This year, ProGlove has successfully closed its second round of financing of \$6.7 million led by Intel Capital, GETTYLAB, Bayern Kapital and DIVC. To date, ProGlove has raised a total of 7,5 million Euros (9,2 million US Dollars).

Today ProGlove consists of a team of 90+ creative minds: with visualization, prototyping and customers at our heart, we have made it our mission to connect the worker to the industrial IoT.

## OUR MISSION

**'Connecting  
the human worker  
to the Industrial IoT'**

**Established: 12/2014**

**Employees: 90+**

### Company Type:

Wearables; Industrial IoT

### Industry:

Manufacturing, Logistics, Automotive, Industrial

### Amount Raised:

\$9.2 million

### Revenue 2016:

7 digits

### Revenue 2017:

Multiple 4x

## KEY CUSTOMERS

**KUKA**

**MAHLE**

**REWE**  
GROUP

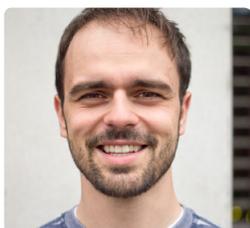

**FESTO**
