From E-Commerce to Omnichannel sorting

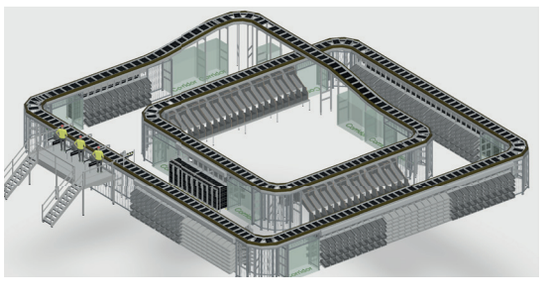

Increasing volumes, hard to find labour, limitations of your current building or equipment. Just some of the challenges in today's order fulfillment landscape. Whether you are running an e-commerce operation or an Omnichannel distribution center, the EuroSort E-SORT with its patent pending SmartWall is what helps you take the next step. This new advanced sorting solution increases productivity and takes order consolidation and returns to new heights with high density sort locations for high volumes of small orders.

Entry-Level

Large E-commerce operation

Omnichannel operation

Why E-SORT with SmartWall is built for e-commerce

- Ultra Flexible: SmartWall allows for multiple exit set-ups to accommodate your full product range
- High-Capacity sorting: up to 28.000 items/hour
- Superior product range: sorts everything from small to large and box to irregularly shaped items
- Compact footprint: high density sort locations for multi SKU orders from 2-25 pieces
- Modular design: Combine SmartWall with other chute designs to set up a truly unique omnichannel operation.
- Build to last: designed for 24/7 use and with low maintenance requirements

SmartWall: endless flexibility

The EuroSort SmartWall allows for endless flexibility in destination set up. Whether you are sorting to chutes, totes or cartons for a small number of items or larger volumes, you can setup the SmartWall the way you want it. See some of the options below. From full E-Commerce to a combination of Retail and E-Comm, or a postal set-up. You decide.

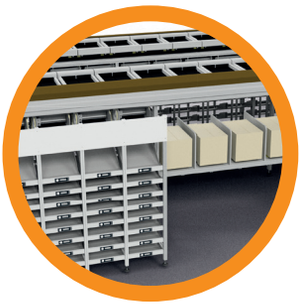

Chute Exits

*subject to item size and batch composition

Proven technology meets innovative powerhouse

The E-SORT uses EuroSort's proven Split Tray Sorter technology, that has been operating in retail and e-commerce operations for almost 25 years. Combined with the innovative power of the SmartWall this has now become the powerhouse for e-commerce sorting, but can also be applied in many other applications and for any type of business, small or large.
